

NGUYEN KHANH HUNG

Developer

☎ 0326886928 ✉ khanhhungnguyen11102003@gmail.com

Summary

Back-end Developer with 1 year of experience in C#, ASP.NET, SQL Server, and Node.js. Experienced in designing and developing RESTful APIs, optimizing database performance, and handling real-world business logic. Passionate about writing clean, maintainable code and building scalable, high-performance systems.

Education

Bachelor of Software Engineering

Ton Duc Thang University

10/2021 - 11/2025

Technical Skills

Languages: C#, Javascript, SQL, HTML/CSS.

Technologies/ Frameworks: ASP.NET Core (Web API, MVC): RESTful API, Dependency Injection, Middleware, Authentication (JWT), Clean Architecture, Entity Framework Core (ORM): Code First, Migration, LINQ, Query Optimization.

Frameworks: ASP.NET (Core, MVC, Web API), Entity Framework,

Database: Sql Sever, MongoDB.

Other Tools: Git (Github, Sourcetree), Postman., Docker

Soft Skills

Collaboration, Problem-solving, Time management, Research, Willing to support colleagues, Meet the Deadline

Languages

English - Aptis ESOL (B1 -B2)

Work Experience

Opus Solution *Fullstack Developer*

6/2025 - 1/2026

Integrated BIDV Digital Banking services into Tasken enterprise management platform.

Stack: ASP.NET, Entity Framework, SQL Server, ReactJS, Ant Design

- Designed and integrated RESTful APIs with BIDV Open Banking to enable real-time transactions.
- Developed backend services for transaction history, 24/7 transfers, and payroll processing.
- Ensured data accuracy, security, and compliance with banking workflows.
- Optimized SQL queries and API performance, improving response time by ~20–30%.
- Tested, debugged, and stabilized system integrations, reducing integration errors.

Opus Solution *Frontend Developer*

4/2025 - 6/2025

Developed and optimized responsive landing pages Tasken

Stack: Next.js, Tailwind CSS

- Developed and optimized landing pages based on UI/UX designs, ensuring accurate implementation and improved user experience.
- Built responsive layouts supporting cross-device compatibility (desktop, tablet, mobile).

Projects

Blog Management

Fullstack Developer

12/2024 - 3/2025

Developed a full-stack blog platform allowing users to create, manage, and interact with posts.

Stack: ASP.NET Core, Entity Framework, SQL Server, ReactJS

- Built RESTful APIs with role-based authorization and CRUD features.
- Applied Clean Architecture and optimized database performance using LINQ.
